REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Vis-à-vis independent claim 31, McMahon is considered the best reference. The electro-optic switching device of McMahon comprises generally a combination of birefringent crystal elements and polarization rotators forming a plurality of units each comprising a birefringent crystal element and polarization rotator. However, the arrangement of the crystal elements and the rotators of McMahon's device is in the reverse order of that of the present invention which is a variable optical delay device. Further, McMahon's device does not have any unit control element that is to be associated with each unit. Therefore, in view of the foregoing, it is noted that the optical performances of the two devices in question are clearly different. Sure enough, one device works as a switch, and the other, as a variable optical delay device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Loha Ben whose telephone number is (571)272-2323. The examiner can normally be reached on Monday to Saturday, generally between 12:00 noon and 8:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Y. Epps, can be reached on Monday to Friday at (571)272-2323.
